SUMMARY

Full Stack Web Developer with a medical and customer service background and a personal interest in engineering. Full-stack Certificate completion imminent through Michigan State University. Adaptive, fast learner with excellent problem solving skills. Level headed applicant that thrives in both high paced environment and long term projects. Attention to detail ideal for quality assurance tasks.

TECHNICAL SKILLS

- HTML5
- CSS3
- Bootstrap
- Javascript
- JQuery
- Node.js
- MySQl
- MongoDB
- React.js

PROJECTS

Good Brews and Neutral Loos
| https://github.com/KellyJohnson364/brews-and-loos |
https://KellyJohnson364.github.io/brews-and-loos

- Search application used Brewery DB and Refuge Restroom Rest APIs to find Breweries with gender neutral restrooms representing safety for the transgender community. The team hopes to expand this app into more industries.
- Initial team role involved primarily javascript. Once the repository was forked, bulma styling and layout was redone by the applicant.
- Styled with Bulma CSS and utilized JQuery.

TheBashful Diner
| https://github.com/KellyJohnson364/the-bashful-diner |
http://theBashfulDiner.com

- Restaurant app designed to eliminate unnecessary dining interactions for those with social anxiety, accessibility issues, or language barriers. Provides access to both customer and restaurant employees to automate the ordering process.
- Team roles included setting up databases, models, and modals, while assisting in routes, and handlebar tasks when required. Played an active role in all areas of the MVC design pattern.
- Used Sequelize, Express, Node.js, MySQL, Bootstrap, Handlebars, Animate CSS, Sweet Alert 2, and the MVC software design pattern

Weather Dashboard
| https://github.com/KellyJohnson364/weather-dashboard |
https://KellyJohnson364.github.io/weather-dashboard

- Dashboard uses Open Weather API and Moment to display current weather conditions and a future 5-day forecast in a user's local area.
- Sole contributor working from a provided user story
- Styled with Bootstrap and was dynamically created using JQuery

EXPERIENCE

November 2012 - March 2020

Perrin Brewing Company, Comstock Park, MI - *Server*

Honed troubleshooting skills while managing the tap systems team. Managed timeline expectations while assisting on the production-line. Utilized both written and face to face communication as a trainer.

- Thrived in team-service atmosphere
- Managed and maintained brewery tap-systems
- Trained over 75 employees, including 90% of management staff

October 2008 - November 2012

Biolife Plasma, Walker, MI - *Phlebotomist*

Witnessed the implementation of new technology improving donor and employee experience. Utilized new software for recordkeeping and identity verification, drastically reducing the chance for human error.

- Oversaw and performed repairs and maintenance on over 100 Autopheresis-C machines.
- Implemented software updates as part of Autopheresis-C upgrades.
- Collected and verified donor information and medical readings per SOP.
- Maintained 99.7% yield as a plasmapheresis technician

Education

MSU, Web Development Certificate-

Attending Trilogy Education Service's full-stack web development certificate program through Michigan State University. Completion expected- July 8th, 2021

Oregon State University -

Studied Biomedical Engineering for two years after receiving my biology degree.

Alma College-

Earned my Bachelor of Science degree in Biology.
